LEARN FROM INDUSTRY EXPERTS

You will be taught by staff with extensive experience who will advance your knowledge and skills to meet the expectations of the IT industry.

DEVELOP PROFESSIONAL SKILLS

During your tutorial programme you will develop personal and work-related skills which will help prepare you for a successful degree or Apprenticeship in the future.

ENJOY PROFESSIONAL TEACHING

Our lecturers are industry experienced and eager to share all the best practice they have gained from their careers. Additionally, we will ensure that you are prepared for professional exams in the future.

WHY CHOOSE THIS COURSE?

The purpose of the Access to Higher Education: Computing and IT course is to provide you a pathway to build a passion for computing, whether that is gaining a qualification to match your professional skills or to gain the skills to take your career forwards.

We build from basic knowledge up to preparation for university. Each topic begins with the understanding that some students within the group will have limited knowledge. We then deliver the content to a high level of competence over the year. It does not matter what existing level of IT skill you have. Whilst existing knowledge will provide an advantage it is not required as we cover each topic from the ground up.

The access course is aimed to prepare you for a university course, which is why over 90% of our students go on to study at university or be in full-time, relevant employment within six months of completing the course. However, many of our students go on to higher Apprenticeships such as Level 4 Apprenticeships in network engineering/software development.

WHAT WILL I LEARN?

Units that you will study include:

WHERE WILL IT TAKE ME?

Upon successful completion of this course you will be able to progress onto an Apprenticeship, university course or gain relevant employment within the IT industry. Some individuals may wish to progress onto a Level 4 course, an example of which is a Network Engineer or Software Developer with City & Guilds. Other students may progress to full degrees, such as Software Development, Robotics, Artificial Intelligence, System Security, Computing Technology and Computer Science.

ENTRY REQUIREMENTS

You must attend an interview with the course leader, your experience and/or attitude will be considered. We recommend that you have GCSE English and Maths at a minimum of Grade 4 (C) before you commence the Access course. However, please contact us to discuss your prior qualifications and planned progression route and we would be happy to advise based on your particular set of circumstances. It is advisable to check the GCSE requirements for the higher education course you wish to complete following the Access course, as they may have different stipulations.
