LEARN STUDY SKILLS

This route provides excellent study skills in specific subject areas, giving people the confidence to s d.

ROUTE TO UNIVERSITY

Students progress to a wide range of universities near and far, and the vast majority of our students are accepted at their first choice of university.

EXPERIENCED SPECIALIST TUTORS

You will be taught by staff with extensive experience who will advance your knowledge and skills to meet the expectations of higher education.

WHY CHOOSE THIS COURSE?

The Access course is a 1-year course run over 3 days per week. It is for adults wanting to gain an academic qualification so as to gain access to University. It provides you with a qualification that leads you into your chosen career in the Health and Social Care sector. In previous years students have gained places to train as nurses, teachers, midwives, paramedics, operating department practitioners, occupational therapists and in other health care professions.

This course also provides learners with a step-up to Higher Education by giving them the necessary grounding and qualifications for progression to University Courses.

WHAT WILL I LEARN?

Students study three core subjects, which are Human Biology, Psychology and Sociology. Together these form the 45 academic subject credits, which can be graded at Pass, Merit or Distinction. In addition to the core subjects learners will also undertake 15 credits in Study Skills. This will help you to develop your written skills, which is particularly important if you have not studied for a number of years. The units are designed to give students the full confidence they will need for Higher Education. Skills developed include: exam preparation and performance, essay writing, referencing, presenting information to peers, how to apply to university, time management, etc.

WHERE WILL IT TAKE ME?

The Access to Higher Education programme is designed to give students the necessary grounding to progress on to Higher Education courses. The majority of British Universities will accept Access to Higher Education courses as an

alternative to A Levels and other more traditional routes. In previous years students have gained places to train as nurses, teachers, midwives, paramedics, operating department practitioners, occupational therapists and in other health care professions.

ENTRY REQUIREMENTS

We recommend that you have GCSE Maths and English at a min of Grade C/4 to complete Access. However, it may be possible to complete one alongside, but this would be considered on a case by case basis. This would have to be done as an evening class. For further information about GCSE Maths or English, please contact Nanette Wherry (Part-time adult education coordinator): nanettew@truro-penwith.ac.uk. It is also advisable to check the GCSE requirements for the higher education course you wish to complete following the Access course as they may have different stipulations.
