C&G LEVEL 2 DIPLOMA IN SITE CARPENTRY

Students will learn the principles of constructing buildings and the types of information used in building design and construction, as well as health, safety, and environmental issues faced on construction sites. Truro and Penwith College has excellent working environments where students learn and develop practical skills.

Level 2 · Other · Truro College

TOP COURSE HIGHLIGHTS

SIMULATED WORKING ENVIRONMENTS | WORK READY TRAINING | REAL WORLD CARPENTRY EXPERIENCE | CAREER PATHWAY

LEARN FROM SECTOR EXPERTS

Students will be taught by lecturers with extensive experience who will advance knowledge and skills to meet the expectations of the construction industry.

ENJOY PROFESSIONAL ENVIRONMENTS

The College's new Construction areas are kitted out with the latest industry-standard equipment and resources, enjoying partnerships with some of the UK's largest industry suppliers.

DEVELOP WORK-RELATED SKILLS

During tutorial programmes students will develop personal and work-related skills that help prepare them for full-time work after completing qualifications at College.

WHY CHOOSE THIS COURSE?

This course is designed to prepare students to be 'work ready', creating a 'real world' carpentry experience with the latest professional tools and equipment to make study as close to a working environment as possible. The course is delivered by passionate lecturers with many years' experience in the trade. The lecturers are well equipped to advise and deliver students onto the career pathway they desire; completion of a Site Carpentry Diploma can open doors to many other routes within the construction profession. Supervisory skills such as planning, organising and pricing work will be covered along with practical skills specific to site carpentry including first fix and second fix tasks.

WHAT WILL I LEARN?

Students will learn the various elements of Site Carpentry enabling them to perform to the expected level within the industry. Units are designed to teach the practical skills involved, as well as an overview of how a construction site is run, including the rules and regulations. Building sites are very strictly controlled, so it's important that students learn about building regulations. The following compulsory units will be studied:

- First Fix Flooring and Roofing
- Secondary Fixing Operations
- First Fix Stairs
- Secondary Fix Double Doors and Mouldings

- Set-Up and use Transportable Machinery

WHERE WILL IT TAKE ME?

This qualification prepares students with the knowledge and practical skills required to become a skilled Site Carpenter. Options to study further would include a higher-level qualification such as a Level 3 Diploma in Site Carpentry, an Apprenticeship with a local employer, or T Level. Students will be able to complete specialist, complex tasks, on a construction site, commercial or domestic premises. You may also become self-employed working as a sub-contractor, and this is a popular route within the industry.

ENTRY REQUIREMENTS

Students will require a Grade 2 GCSE in English and Maths, a keen interest in construction and a good work ethic. Students must be able to work alone, as part of a team and demonstrate commitment to the course.
