

Level 1 Introduction to IT Progression

Why choose this course?

If you enjoy learning about a range of exciting technologies, this one year course will stretch and challenge you while providing valuable insights into how ICT is used today. This programme includes the BTEC Level 1 Certificate in ICT and GCSE English and Maths.

What will I learn?

You will study four core units to help develop skills in planning for progression, working with others, internet research and being organised. Other units will include developing digital information, solving technical IT problems, creating a working spreadsheet model, building a website and developing digital and animated graphics. There are no course exams; all units are assignment based.

Where will it take me?

Successful completion of the course to at least an overall merit will allow progression to the Level 2 Information and Creative Technology course.

What do I need?

You need to have achieved Grade 1 in English & Maths GCSE , you must have a keen interest in IT and demonstrate commitment to the course.
